

Evelyn Brackebusch

Frontend Developer

(<https://www.linkedin.com/in/evelyn-brackebusch-548b4a205/?skipRedirect=true>) |

(<https://github.com/Evelyn333444/Evelyn333444>) | (615-878-2430) | (brackesb12@gmail.com) | (Mobile, AL) | (<https://gumbo6-advanced-e-portfolio-o5ya.vercel.app/>)

A versatile software developer with a year of experience, specializing in both frontend and fullstack development. Proficient in a broad range of technologies including React, Firebase and more. Passionate about building scalable, efficient and user-friendly applications.

Projects (personal)

Skinstric AI Internship Project: <https://skinstric-ai-internship-n137.vercel.app/> | <https://github.com/Evelyn333444/Skinstric-AI-internship>

Created a fully functional skincare website

- Engineered & integrated two APIs (saving information within the website and generating demographic results based on an image of the user's face) with a fully responsive design, loading states & precise results.

(Summarist Internship): <https://advanced-virtual-internship-module.vercel.app/> | <https://github.com/Evelyn333444/advanced-virtual-internship-module-10>

Created a fully functioning book app

- Engineered and integrated an API for storing information about books displayed and selected by the user with a fully functioning login status using Firebase, loading states, audio recording, and an option to upgrade to premium status if the user has made a free account within the website.

(Ultraverse): <https://evelyn-internship-y26l.vercel.app/> | <https://github.com/Evelyn333444/evelyn-internship/tree/main/public>

Created a fully functioning NFT marketplace

- Engineered and integrated an API for digital items and NFT-style collections in a responsive NFT marketplace.

(Treact Project): <https://evelyn333444.github.io/gumbo5-final-project-on-my-own//> | <https://github.com/Evelyn333444/gumbo5-final-project-on-my-own>

Created a home page for a website for templates

- Engineered and integrated a home page for a website that designs templates for companies.

(React JS Movie Project): <https://gumbo-11-module-7-final-project.vercel.app/> | <https://github.com/Evelyn333444/gumbo-11-module-7-final-project>

Created a fully functioning movie selection website

- Engineered and integrated an API for movies/anime/etc with a fully functioning search bar and sorting feature for movies, which sorts the movies either by newest to oldest or oldest to newest, which the user can choose, and shows the title, year of release and type of movie when the user clicks on a movie.

Technical Skills
